

# 7 Hits in 3 Weeks!

**I Just Missed a \$450 Payday – AGAIN!**

I have some exciting new developments!

I explained in my **Final Solution Report** that I have a system based on two numbers. After looking over my notes and what has actually hit, I now see that I should play these two box numbers **PLUS the two hottest PAIRS**. I call this the 4-set (2 box numbers and 2 pairs). Each pair represents 10 numbers. For example, pair 38 means that these numbers will have to be played: 380, 381, 382, 383, 384, 385, 386, 387, 388, 389. This means that the 4-set represents 22 numbers. This is more numbers than I would want, but this will result in steady consistent hits.

For example, this system told me that the two hottest pairs for New York for the week of Sunday January 28 to Saturday February 3 were **29** and **79**. Both of these pairs hit as doubles. The numbers **992** and **797** hit on January 31.

No hits from the system during the week of Feb 4 to Feb 10.

The system told me that the two hottest pairs in New York for the week of Feb 11 to Feb 17 (last week) were 58 and 89.

**Double 558** hit NY on February 12.

**Double 998** hit NY on February 16.

**Single 897** hit NY on February 17.

**That's TWO Doubles and a Single in ONE Week!**

And the system told me on Saturday night that the two hottest pairs **this week** (Feb 18 to Feb 24) are **38** and **28**.

**383** hit right out of the gate the next day (Sunday Feb 18).

**822** (another double!) hit the next day on Monday Feb 19.

**That's TWO Doubles in TWO Days!**

It is clear to me now that the **winning combination** is playing the two hottest singles and the two hottest pairs. So I am changing things around (and updating the report I am writing) to reflect this update.

**Here is another exciting update:** I sent out instructions to an assistant I work with on how to code a state; specifically, NORTH CAROLINA. I sent her written instructions plus an Excel sheet to do the coding on. She did great. This taught me that I can teach this easily via email alone. So here is what I am thinking: **If you would like for me to teach you this coding system NOW, I can teach it to you BEFORE my report comes out! More details on this later!**

**This coding system is so powerful and accurate that it may end up being the ONLY Pick 3 system you will ever use for the rest of your life! There are MANY advantages to this system over EVERY OTHER SYSTEM in the market. For one, it will tell you exactly when to START playing a set of numbers and most importantly, when to STOP playing those numbers (I call this **Containment**). You can also use this coding system to identify hidden patterns within the game. For example, you can know what will be the hottest singles, doubles, and pairs for the coming week once you learn this system!**

**Knowing my coding system is almost like “cheating” because it will tell you ahead of time what numbers, doubles and pairs will hit your state in the next 7 days!**

## I Just Missed a **\$450** Payday (Again!)

Here is how powerful this coding system is with JUST the two numbers (without the two pairs).

I recently sent out a report titled **I Just Missed a \$450 Payday** (email me if you did not get it). I was playing the number **958** straight in New York just last week (Feb 11 to Feb 17) and the number **955** hit on February 13. I missed winning **\$450** by one digit!

Guess what?

It happened AGAIN last night!

I am playing number **214** straight in New York this week (Jan 18 to Jan 24) – and the number **204** hit LAST NIGHT! (You can clearly see the date, January 20, on my 5dimes back office below).

Here is why the 4-set strategy is better than my 2 number strategy:

I would have gotten **7 HITS** in the last 3 weeks if I would been playing the 4-set for New York instead of just the two hot singles for New York.

I would have hit **822** THIS WEEK (pair 28) on Feb 19.  
 I would have hit **383** THIS WEEK (pair 38) on Feb 18.  
 I would have hit **897** (pair 89) on Feb 17.  
 I would have hit **998** (pair 89) on Feb 16.  
 I would have hit **558** (pair 58) on Feb 12.  
 I would have hit **992** (pair 89) on Jan 31.  
 I would have hit **797** (pair 79) on Jan 31.

**That's 7 hits by just adding the two hottest pairs from my coding system – and most of these hits were DOUBLES!**

**MY NEW BETTING STRATEGY:** I will be changing my betting strategy. I will be playing the 12 straight numbers for 0.25 cents (the two hot singles from the 4-set can be converted into 12 straight numbers). This will be \$6 spent per day or \$42 per week (played for 0.25 cents at 5dimes.com). The two pairs will give me 20 box numbers. These can be played for \$10 per day, which will be \$70 per week. So the weekly investment will be \$112. The straight hits will pay **\$225** and the box hits will pay **\$37.50**. **However, these pairs tend to hit as DOUBLES, so the payout will many times be \$75.**

**I can teach you the coding system responsible for these 7 hits (and the 2 straight number misses in two weeks!) NOW.**

This means that you will not have to wait for my report; you can learn how to use my coding system immediately (I am currently writing the **7 Day Coding System** report – but it will take a few weeks for it to be completed).

I will explain how to code the Pick 3 numbers, step by step. I will go over your work to make sure you got it right. I will teach you my coding system using North Carolina numbers since I already have written instructions for this state (coding is the SAME for all the states).

<https://www.lotterypost.com/results/nc/calendar/pick3/2018>

You will code a few weeks in North Carolina. You will be able to email me your questions during the coaching period which is two weeks long.

Once you understand the process, you can move on to your state. For example, if you play Texas, you will start to code Texas. You need at least 12 weeks of codes to identify the 4-set: the two hottest box numbers and the two hottest pairs. I will help you identify these. NOTE: There are 24 numbers per week in Texas so this means that you will need at least 288 codes to determine the 4-set for Texas;  $24 \times 12 \text{ weeks} = 288$ .

And I will repeat what I said before; this coding system will most likely end up being my FINAL solution to the Pick 3 game because I really do not see anything better; THIS IS IT. I may change the information I get out the codes (you can use the codes to predict the hottest digits, pairs, box numbers, front pairs, etc.) but **the coding system itself will remain my dominant strategy.**

If you would like to get my instructions to learn my coding system NOW - PLUS **get my Excel sheet already formatted** to do the coding process, the price is **\$60**. This includes:

- Two weeks of email instructions to code NORTH CAROLINA (once you learn the basic coding process, you can code ANY state).
- My Excel Coding sheet.
- **Email Coaching:** You can email me any coding question you have during the two weeks. (If you would like PHONE COACHING as well, email me for details)
- You will also get an early (unfinished) version of my future report titled: **The 7 Day Coding System**.

If interested, email me with **\$60-7 Day Coding System** on the subject line of your email and I will send you a Paypal invoice right away. I will email you my Excel sheet and report with instructions on how to code right after I get payment. You will be coding 3 WEEKS in North Carolina. You can email me your coding questions anytime during the next TWO WEEKS. This should be enough time for you to learn the system and do it on your own. Once you learn the system, you can start coding your state.

**AFTER** you have collected the codes of the last 12 to 15 weeks in your state, I will show you how to identify the two hottest **NUMBERS** and the two hottest **PAIRS** in your state. This is the 4-set for your state. They are played Sunday through Saturday.

**THE 4-SET CHANGES EVERY WEEK.**

You get a new 4-set after the last drawing on Saturday night; it will be good for the next 7 days.
