

The 70-100-200 Coding Evaluation System

I just learned a valuable lesson:

If you are using my **7 Day Coding System**, you will have to identify the hottest pairs in the last 70, 100, and 200 codes to find out what are the hottest pairs to play **right now**. I have been evaluating the game based on the codes of the last 25 to 30 weeks (the last 350 and 420 codes) – but it turns out that I have to look at more RECENT codes to see what pairs are really hot RIGHT NOW - not 25 weeks ago.

I am writing this on Saturday morning on June 2, 2018 and I played the pairs corresponding to pair code 01 (Pair 85) and pair code 79 (Pair 42) this week in New York – **but it turns out that these are NOT the two hottest pairs right now**. The two hottest pair codes in New York now are actually **01** and **12** (85 and 50 for this week in New York: May 27 to June 2). I learned this by evaluating 3 sets of codes: the last 70, 100, and 200 codes. You can see the output from the **Pair Frequency Finder** program for these codes on the next 3 pages. The hottest pairs are **red** in the output.

01 17 3.119

12 15 2.752

23 15 2.752

24 15 2.752

As you can see in the previous pages, the two hottest pair codes are 01 and 12.

If you read the **Coding Report**, you know what I will do next: I will put the regular digits up in the Anchor position (01234-56789) and then I will write the codes for the two hot pairs on top of my Excel sheet, which is **included** with the purchase of the **Coding Report**.

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
0	1	2	3	4							0	1		
5	6	7	8	9							1	2		

These two codes will be automatically turned into the actual pairs to play in the next 7 days after I enter the most recent 40 number distribution (done on Saturday night). The Excel sheet does this conversation for you (the spreadsheet is especially formatted to do this conversation from CODE to ACTUAL PAIR to play once you enter the distribution digits in the Anchor position; ABCDE in the image above).

Below is the 40 number distribution starting from the last number that hit New York on Saturday May 26, 2018. The distribution are the blue numbers (8 is the hottest digit in the 40 numbers entered, followed by 5, 0, 9, etc. - and 2 is the coldest digit).

 899 371 058 513 878 442 697 007 079 261

8 5 0 9 7

1 3 4 6 2

This is the distribution....

8 5 0 9 7

1 3 4 6 2

When I enter these digits in my Excel sheet in the Anchor position, I get the actual pairs to play in the next 7 days (SUNDAY May 27 to SATURDAY June 2). As you can see, the pairs to play are **85** and **50**.

A	B	C	D	E	F	G	H	I	J	K	L	M	N
8	5	0	9	7							8	5	
1	3	4	6	2							5	0	

Did these pairs hit in the next 7 days (May 27-June 2)?

YES!

550 (Pair 50) Hit New York on Monday May 28.

075 (Pair 50) Hit New York on Monday May 28.

29	30	31	1	2
			052	819
			841	

No hits from pair 85 – but just one of the two pairs hit 3 times!

I did NOT get these hits because I was playing pairs 85 and 42 (based on the last **350** codes or 25 weeks). **I would have gotten these 3 hits if I would have identified the hottest codes in the most recent 5 to 14 weeks** (70 codes = 5 weeks, 200 codes = 14 weeks).

The lesson here is clear: **You have to stay on top of the codes.** More specifically, you have to see what are the two hottest pair codes in the last 70, 100, and 200 codes collected to identify what are the two hottest pairs in YOUR STATE right now. Look at the top 2, 3, and 4 codes in each of the outputs (70, 100, 200) and see which codes repeat. Identify the two hottest pairs and enter the codes for these two pairs on top of your Excel sheet (**I explain all this in the Coding Report**). Enter the 40 number distribution on Saturday night. The codes will be automatically converted into the pairs to play.

That is why I said in the **Coding Report** that this system should NOT be put in a program because these codes will have to be updated on a regular basis. Now I see that the updating is based on the most recent 70, 100, and 200 codes collected.

This means that the pairs that the 2-Hot Pairs and 3-Hot Pairs programs give you are **generic hot pairs** – they may or may not be the hottest pairs in a particular state right now.

Pairs Programs
