

# Pair 79

## Question and Answer

### Question

Hello Anthony. I read your latest report on Pair 79. I like how in the report you explain how playing the pair 79 numbers will give you more consistent hits than playing the Hot Codes.

So just to clarify: **should we totally abort playing the Hot Codes and just focus on playing the Pair 79** numbers or should we also still continue playing some of the hot codes considering that a few of them may still hit from time to time?

Also my final question is since you're now going back to your original plan; does this also mean that you will still be releasing your new kindle (**A Sure Thing**) in the next upcoming weeks?

### Answer

To clarify: **Only play the 10 numbers corresponding to pair 79.** That would have given you TWO hits this week in New York (pair 79 this week is pair 35: **835** and **953** hit NY on Tuesday August 7).

Two Hot Pairs

 530 531 532 533 534 535 536 537 538 539

**NOTE:** To those of you are new; my coding system is based on this matrix:

<b>0</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>
<b>5</b>	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>

Pair 79 are the two digits that show up in positions 7 and 9 in the 40 number distribution.

<b>0</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>
<b>5</b>	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>

If you write out all the codes with pair 79 you will see that some of the codes hit more than others (just enter all of them into the **Group Matching System** program); these are the only "hot codes" you should be playing. I will send these out soon...but you can do it on your own if you have the codes for NY.

**I do NOT recommend playing other hot codes.**

I know...it's tempting...but the BIG money will be made **by playing LESS numbers** - not more numbers.

So if you have extra money; just double down on the pair 79 numbers; based on what I see week after week, you WILL hit.

If the pair does NOT hit this week, **you will most likely see TWO pair 79 numbers hitting the following week** (that is what happened in NY this week, pair 79 did not hit last week; two pair 79 numbers hit this week: 835 and 953).

Also, if you play the numbers straight (54 straight numbers) you will be spending \$189 per week, which is a lot of money for some people - so playing more numbers on top of the 10 numbers for pair 79 will be expensive.

There is another reason why you should only play the 10 numbers that correspond to pair 79 (or whatever is the hottest pair in any state): **you will get better and BETTER at knowing which of the 10 numbers will hit.**

If I FOCUS and really pay attention to the 10 numbers week after week, **I see myself reaching a point where I can narrow it down to just ONE or TWO numbers to play in the next 7 days.**

I can only do this if I focus on one thing (pair 79) – not if I keep jumping around between the hot codes (which are always changing) and this pair 79 system (which is very stable).

How did I come up with \$189?

The 10 numbers for pair 79 will be turned into 54 straight numbers. If played for 0.25 cents at 5dimes.com, this means \$27 will be spent per day (2 drawings per day) which is \$189 spent per week (\$27 X 7). The payout is \$225.

 530 531 532 533 534 535 536 537 538 539 543 553 563 573 583  
 593 635 653 735 753 835 853 935 953 (**54**)

(By the way...spending \$189 per week is how I got my last 3 straight hits: <https://pick3master333.com/box-hits/>)

I am not sure if I will be putting up the **A Sure Thing** Kindle because I pretty much already explained what that Sure Thing is: **the hottest pair will hit week after week in your state – and when it misses a week it will usually hit TWICE the following week** (like it did in NY this week: 835 and 953).
